Eslam Ahmed Mahmoud Ghanem

Full Stack Web Developer (PHP)

Email: eslamahmedghanem77@gmail.com . **Phone:** 01280102968

GitHub: https://github.com/eslamghanm .   **Portfolio:** https://myportifolio12.netlify.app/

LinkedIn: https://www.linkedin.com/in/eslam-ghanem1/

Summary

Full Stack Web Developer experienced in PHP and Laravel, with strong skills in building scalable web applications, RESTful APIs, and database-driven systems. Hands-on experience with Livewire, Angular, and AI-integrated solutions.

Internships

Full Stack Web Development Using PHP — Information Technology Institute (ITI)

Graduated: December 2025
   Key Topics:
   • PHP OOP & MVC Architecture
   • Laravel (Routing, Controllers, Eloquent ORM)
   • RESTful API Development & Integration
   • JavaScript & Angular Fundamentals
   • MySQL Database Design
   • Docker Fundamentals
   • Git & Team Collaboration Tools

Education

B.Sc. Computer Science & Artificial Intelligence (Medical Informatics)
Faculty of Computer Science & Artificial Intelligence, Helwan University
Graduated: 2023 — Grade: Very Good

Projects (All projects are available on GitHub)

- **AI-Based Diagnosis Prediction & Clinical Management System (Graduation Project)**
  AI-powered system for disease prediction and patient data management through an interactive clinical dashboard.
  Technologies: Python, Scikit-learn, Flask, MySQL, HTML5, CSS3, JavaScript, Bootstrap

- **Dental Clinical Management System — Freelance (2025)**
  Developed a secure web-based system for managing dental clinic operations, including patient records, appointments, and treatment history.
  Technologies: Laravel, MySQL, HTML5, CSS3, JavaScript, Bootstrap

- **Medical Appointment Booking System with AI Support (ITI Final Project)**

Built a role-based system for managing medical appointments, doctors schedules, and patient records, enhanced with AI-powered assistance features.
Technologies: Laravel, Angular, TypeScript, MySQL, REST APIs

- **AI Desk Support System (Current Project)**
  Built an AI-powered helpdesk system for managing support tickets with role-based access and AI-assisted responses.
  Technologies: Laravel, Livewire, Filament, MySQL, REST APIs, AI Integration

- **Event Management System (Front-End)**
  Designed and implemented a role-based event planning interface for managing events, guests, and budgets using localStorage simulation.
  Technologies: Angular, TypeScript, HTML5, CSS3, Bootstrap

- **Multi-Actor E-commerce System (Front-End)**
  Developed a responsive e-commerce platform supporting customers, sellers, and admins with cart and checkout functionality.
  Technologies: HTML5, CSS3, JavaScript, Bootstrap, SweetAlert2, LocalStorage

Technical Skills

- **Backend:**
  PHP (OOP, MVC)
  Laravel (Eloquent ORM, Livewire, Filament, REST APIs)
  Authentication & Authorization
  Queues & Jobs
  API Integration & Security

- **Frontend:**
  JavaScript (ES6+)
  Angular & TypeScript
  React.js (Basics)
  HTML5, CSS3, Bootstrap, SASS

- **Databases**:
  MySQL, SQLite
  Local Storage, Session Storage

- **DevOps & Tools:**
  Git & GitHub
  Docker & Docker Compose (basics)
  Jenkins (basics)
  Linux (basic Commands)
  Postman

Languages

- Arabic: Native
- English: Professional Working Proficiency
